(Version 7.0)

Contents

I Introduction **1**

1 Overview **3**
- 1.1 Fanatics Need Not Read Further 4
- 1.2 The Name of the Game 5
- 1.3 Operating Environments 5
- 1.4 Organisation of the Release 7
- 1.5 A Note on This Implementation 9
- 1.6 Changes Since the Last Release 10

II Overview **13**

2 Motivation and Concepts **15**
- 2.1 A Model for Distributed Applications 15
  - 2.1.1 Abstract Data Types 16
  - 2.1.2 Operations 17
  - 2.1.3 Associations 18
- 2.2 Design Guidelines 18
  - 2.2.1 Reliability Characteristics 19
  - 2.2.2 Keeping Total Operations Total 19
- 2.3 For Further Reading 20

3 A Discipline for Meal Preparation **21**
- 3.1 Defining A New Service 21
- 3.2 Defining A Remote Operations Module 23
- 3.3 Defining Concrete Data Structures 24
- 3.4 Building An Initiator 24

3.5 Building A Responder 24
3.6 Putting It All Together 25

III Utensils 27

4 Remote Operations Stub-Generator 29
4.1 Remote Operations Module 29
4.1.1 Operation Definitions 30
4.1.2 Error Definitions 30
4.1.3 Type Definitions 30
4.2 ROSY Environment 35
4.2.1 Abstract Syntax Module 35
4.2.2 C Language Stubs 35
4.3 Known Deficiences 36
4.4 Running ROSY 36
4.4.1 Options 36
4.4.2 Makefiles 37
4.4.3 Grinding 38

5 Pepy Optional Structure-Generator 39
5.1 Abstract Syntax Module 39
5.2 POSY Environment 43
5.2.1 C Language Structures 43
5.2.2 Augmented Abstract Syntax Module 48
5.3 Known Deficiences 52
5.4 Running POSY 52
5.4.1 Options 52
5.4.2 Makefiles 53

6 Compiling Data-Structures 59
6.1 Warning 59
6.2 Syntax Rules 59
6.2.1 ASN.1 Notation 60
6.2.2 ASN.1 Extensions 60
6.3 Known Deficiencies 72
6.3.1 ASN.1 Syntax 72

6.3.2 ASN.1 Semantics 73
6.4 PEPY Environment 73
6.4.1 Starting Things Off 73
6.4.2 Diagnostic Output 74
6.4.3 Debug Output 75
6.5 Pretty-printers 75
6.6 Compiling and Loading 76
6.6.1 External Modules 76
6.6.2 Options 76
6.6.3 Makefiles 77
6.6.4 Grinding 78
6.7 An Example 78
6.8 For Further Reading 87

7 Pepsy **88**
7.1 Abstract Syntax Module 88
7.2 PEPSY Environment 89
7.2.1 C Language Structures 89
7.2.2 Mapping tables 89
7.3 Known Deficiences 89
7.4 Running PEPSY 89
7.4.1 Options 89
7.4.2 Makefiles 90
7.5 Pepy Enhancements to Pepsy 90
7.5.1 Verbatim Actions 91
7.5.2 Value Passing Statements 91
7.5.3 Constructed Types - Sequence and Set 94
7.5.4 Choice 97
7.5.5 Default 97
7.5.6 Optional 98
7.5.7 Encoding and Decoding Functions 99
7.5.8 Pepsy C Action Statements 102
7.5.9 External Type References 102

IV Recipes **103**

8 Run-Time Environment **105**
8.1 Notice . . . 105
8.2 Conventions . . . 105
8.2.1 Interface from ROSY . . . 106
8.3 Routines for Initiators . . . 108
8.4 Routines for Invokers . . . 108
8.5 Routines for Responders . . . 114
8.6 Routines for Performers . . . 114
8.6.1 Registering Operations . . . 114
8.6.2 Responding to Operations . . . 116
8.7 Waiting for Events . . . 118
8.8 Miscellaneous Routines . . . 119
8.8.1 Association Termination . . . 119
8.8.2 Utility Routines . . . 120
8.9 Error Conventions . . . 121
8.10 Compiling and Loading . . . 121

9 Boilerplate for Initiators **122**
9.1 Embedded Initiator . . . 122
9.1.1 Association Establishment . . . 122
9.1.2 Operation Invocation . . . 125
9.1.3 Association Release . . . 131
9.1.4 Error Handling . . . 132
9.2 Interactive Initiator . . . 136
9.2.1 Include File . . . 136
9.2.2 Worker Routines . . . 137
9.2.3 An Example . . . 148

10 Boilerplate for Responders **150**
10.1 Static Responder . . . 150
10.1.1 Association Management . . . 151
10.1.2 Operation Response . . . 162
10.1.3 Error Handling . . . 165
10.1.4 An Example . . . 168

11 A Complete Example **169**
11.1 Service Definitions 169
11.2 Remote Operations Module 170
11.3 Interactive Initiator 178
11.4 Responder 184

This document (version #6.27) was LaTeXset July 18, 1991 with lplain v2.09-10/29/85.

List of Figures

4.1 Example of a Remote Operations Module 34

5.1 Example of an Abstract Syntax Module 42
5.2 Example of C Language Structures 51
5.3 Example of C Language Structures (with -h0) 57
5.4 Example of C Language Structures (with -h2) 58

6.1 Example of a specification using ASN.1 61
6.2 Example of a TYPE action 65
6.3 Example of a TAG action 65
6.4 Examples of CONTROL actions 68
6.5 Examples of Parameters in Pepy 71
6.6 Simpler Pretty-Printer initialization 76
6.7 Grind Entry for pretty-printing PEPY programs 79
6.8 Pretty-Printer initialization 80
6.9 Pretty-Printer top-level 82
6.10 Pretty-Printer type definitions 83
6.11 Pretty-Printer finalization 85

7.1 Pepsy value passing 92
7.2 Constructed Type Example 95
7.3 Repeated Type Example 96
7.4 Pepy-like selector in a choice 98
7.5 Optional C-expression/lvalue 99
7.6 Example of Encoding/Decoding functions 100
7.7 Definition of an Encoding function 101
7.8 Definition of a Decoding function 102

11.1 Remote Operations Module for the Password Lookup Service . 173
11.2 Makefile for the Password Lookup Service 177
11.3 Initiator for the Password Lookup Service 183
11.4 Responder for the Password Lookup Service 189

Preface

The software described herein has been developed as a research tool and represents an effort to promote the use of the International Organisation for Standardisation (ISO) interpretation of open systems interconnection (OSI), particularly in the Internet and RARE research communities.
