Re: Patent Licensing Statement for Camellia

Dear Sir or Madam:

Enclosed herewith please find an original copy of our IPR licensing statement relating to the patents and patent applications jointly owned by Nippon Telegraph and Telephone Corporation (NTT) and Mitsubishi Electric Corporation (Mitsubishi) which are essential to implement Camellia encryption technology. We are submitting this licensing statement in connection with NTT's contribution to IETF IP sec standard.

Although we know IETF provides templates on its website for patent disclosures and licensing declarations, we have found the current forms are not suitable for precisely expressing our licensing intention relating to our Camellia essential patents. If any supplemental information or process should be required, your instruction would be highly appreciated.

Thank you for your cooperation.

Very truly yours,

A handwritten signature in black ink, appearing to read "S. Torayama".

Re: Patent Statement pertaining to Camellia

Dear Sir:

Nippon Telegraph and Telephone Corporation and Mitsubishi Electric Corporation (hereinafter refers as “Parties”) believe to hold granted patents and/or pending application (hereinafter refers as “Patents”), which is/are essential to implement Camellia.

On condition that other company and/or entity shall grant their patents essentially required to IETF IP sec standard (hereinafter refers as “Standard”) under fair and commercially reasonable terms and conditions on non-discriminatory basis in accordance with RFC 2026, Parties hereby declare that, to the extent that Patents are essential to Camellia, Parties are prepared to grant, on the basis of reciprocity and non-discriminatory for Standard, a royalty-free license under Patents to an unrestricted number of applicants throughout the world to manufacture, use and/or sell implementations of Camellia with respect to the application area of the Standard.

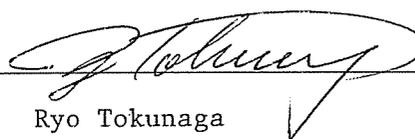

Notwithstanding the foregoing, Parties shall reserve any and all rights to enforce Patents against any applicant in the event that such applicant assert any patent related to cryptographic technology which is essentially required to products fully complied with Standard.

Sincerely,

Takashi Suzuki
