DREADSTAR / AVALANCHE

INTERVIEW FROM CLONES

For our "BYG" issue 2, we're releazed another clones interview (complete and addictive), and hope that you'll like it. Featuring: Awcy (organizer, leader) interviewed on 06.01.1990:

1. Your memberlist and members activities?

Awcy (founder, organizer, coder, swapper, phreaker) - Barbara (desginer, girl) - Bozo (phreaker, Brainie (swapper) - Brains (coder, girl) - Geek (hardware wizard) - Gizzy (main swapper) - Idle (swapper, gfix) - Jukkis (lamer, coder, phreaker) - Kinky roy (swapper) - Mawerick (swap) Microman (mascot) - Ooze (designer) - Particle (designer, musician) - Phobos (phreaker) - Psycho (swapper) - Scarface (swapper) - Sir Arthur (designer) - Sod (swap) - Xa (swap) - The dunk (coder, anti-booze man) - The founder (designer, girl) - Whiskey (musician).

2. When were Clones born on c-64 or Amiga?

Clones were born on the 22.08.1988 only on Amiga, now one of us swaps also on Pc-Compatibles. We haven't any C-64 members in Clones.

3. Your main activities? Muzaks? Cracks?

We produce nowadays mainly The Final Ecstazy magazine, wich is the only pornographic mag on amiga scene. But we also make some funny scroll-text based intros and some music-disks. Also a proper demo-creator is coming ...

4. Have you ever co-operated with any teams?

No, but about four months ago, we became a subdivision of Bloodsuckers. It lasted only for two days, after those days we decided to leave Bloodsuckers, 'coz they tried to use our musics to get more famous! Bloodsuckers were no use for us, just a stupid mistake!

5. Tell your opinion about finnish party...

When you come to Finland for copy-parties, forget the copying! The most important thing is to have a really goos time meeting your friends and to drink as much booze as possible! rrraaaaap! (Except if you come to GATE's parties, remember: NO DRINKING ALLOWED! it's too boring!!!)

6. Could you give us your greetings list ?

Okay, you asked for it! don't blame me.....

NEWS FROMTOP SWAP

Well, i'm codeman of top swap on 6.01.1990, i want to talk a bit about synth music, yeeeahhh!!! i dig all of it, but depeche mode is the absolutery best available today; erasure is good indeed but i liked more in the old days. Their latest album (Wild) is good but i think "the circus" was more heavier, and not to talk about the good old Yazoo, one of the best in the past (1982, gasp!). But the mini lp Crackers International was rather good. Anyway, other good groups nowaday i think is Front 242, Borghesia, Cabaret voltair, FrontLineAssembly, Nitzer Ebb, Click Click, a Split Second, a;grum...and so on. And many other groups wich play a more deeper synth music "Electronic Body Music" & "New Beat". Front 242's concert last year in Sweden as fantastic. And some month ago a; grumph...Click Click and SnowyRED were visiting sweden, playing at the same concert ClickCLick realy was coool on stage, better than their lp's but a;grumph... was a disapointment, coz their singer couldn't come to the concert, coz his got a 2 weeks old baby and his wife didn't accept that he're going. So, instead of him another guy sang, not to good i say...Anyway, now i am waiting for Mode's new album it is said it will be releazed in beginning of 1990, and their (old) latest maxi releaze was so good, (suppose you heard it ... "Personnal jesus"): especially the phone mix. And Front is also coming up with something new soon i hope. Yesterday, i bought Borghesias new Lp called "Resistance" (they come from Jusgoslavia). The title track is absolutery one of the best last year (1989); okay enough to talk about that i send golden greets for my contacts (especially for babygang...normal!). bye, pals!

Byg ISSUE 3 MARCH 1990

INTERVIEW CLONES (Part 2)

15. What's the meaning of your 'kisses" to talk in your intros? - Just plain greets to girlies i and sod know! My kisses to: Anu, Nina, Marja, Hege, Lene and Trine. SOD's kisses to Bente & Silhe! 16. You have any sections in different countries than finland?

- Yes, we've sections in Australia, Norway, Island and Germany.

17. What's your age ?

- I'm 17 years old at the moment, i'll be 18 at 7th of March 1990.

18. What's your opinion about finnish post, toll and police? - Finnish post it's okay for me, finnish toll too (stupids didn't open a...

pack from saigon of savage even if there was written "2 beer bottles" on the green toll ticket! hohoo!) and finnish police is zero for me when talking about computer business.

19. that's all this time. Thanx for interview! any last words? "Look up to the sky, see those million stars? try to reach 'em, try to touch them...but still in vain. That's the way i am, a distant dream. One more to fade away, to be remembered never again..."

KID ICARUS & BABYGANG

COMPLEX INTERVIEW FROM

1. When & how i was started my computer hobby?

I get my first computer in 1985 and that computer is solora fellow (boring machine, no demos & games) after that in shame year, i buy my second (!!!) computer called VIC-20 (vic is little bit more better than my first machine). After that in year 1987 or it's 1986, i get legendary C-64 on my table (shit!!). And after that, i buy my Amiga (official buying day is: 02. 01.1988 and at the end of year 1988, i was started my computer business, that's it!

2. When COMPLEX was born?

Actually COMPLEX was born in June 1989. We're still young team (no?), Complex born when Phalanx & Overload joining together...

3. Police and post activities ?

Policemans don't are interested at all what computer freaks do (and if they do somethin' insomeday, they do only a job). But, post in Finland is so fuck' stupid, 'coz they steal some letter ans so on.

INTERVIEW FROM UNICORN

First of all, thank to Cobold / Brainstorm for the first part of this interview, Here's Mister Mig / Unicorn : 1°) Far how long has unicorn been existing ?

We know us since 1984, and we went public in summer 1988 as a crew.

(programmer, coder, cracker)

2°) Give us your members list and their functions !

We're 2 crackers, 3 coders, 2 graphics, 1 musician and 2 spreaders in form of five persons. Here's our members :

* Mister mig (coder, spreader, compactings maker)

* Mad (coder)

* Ypsilon

(compactings maker, spreader, coder) * Pld

* Axk (musician, coder)

3°) Wich are the positive points in the scene and wich are the negative ones ?

Positive are the connections between the groups. We enjoy new progamming tricks from other crews, negative are crew-wars, antidemos, facist and racist propaganda.

49 Are you afraid by the police & wich are some tricks not to be caught ?

Coz of own negative experiences we can give you the following tips : no disks in your own room, no synonyms on the disks, no crewnames on letters for spreading and don't let addressbooks or memo-calculators fly around.

5") Wich are the leading five groups for you?

1. Quartex The band 2. Paranoimia

4. Vision factory

Black monks

6") Wich music are you listening to ?

Everything but heino! on amiga we especially like music from beathoven, axk, mark II, all. I listening all good music like : scorpions, midnight oil, judas priest, phil collins, genesis, russ ballad, toto, supertramp, yes, zz top, transvision vamp, foreigner, erasure, run dmc, chris rea, the beatles, etc... And i look all good films like ABYSS, Asterix and Obelix, etc...

7°) What do you on saturday evenings ?

For example, going on india dinner or to answer such mad interviews.

8") Do ya like Mc Donalds †

Yes, from outside!

9") As you search some new members under the world?

No coz of our reglement, we must've denied all this quotations of this people for a membership. It's bad i know. But we don't want to end like World of wonders. Prophets ag, Threat of Black monks in a confusion of uncountable people. It's a come and go. We want steady members, friends who have the same sense, the same ideology, as our steady members but don't worry...

10°) how is composed unicorn?

Our crew is divised in 3 sections: the HAND middle of unicorn (founder and first members), members of unicorn, and "free constributors" of unicorn (all the good friends and helps of unicorn, who live outside of the 50 km-zone of our city). The HAND middle and the members of unicorn are all living inside a "LIMITE" of 50 km of our city.

II') What's your productions I tell us......

Soundtracker disks 1 to 8, populous + 100%, windsurf willy (supplied by kid icarus), forgotten worlds 100%, a-max and oktalyzer (2 disks), battle force, neckforce, hyperforce, onslaught, mach 2, lattice c 5.28 (5 disks), compactings games, compactings demos (1 to 20), hawar odyssey (flight simulator scenery), and some other cool productions......

12") Why does you want "Free constributor" members now ?

The main reason is the speed of having a decision of a problem for a discussion with the whole group. We would be glad, we can congratulate some persons for a membership as "FREE CONSTRIBUTOR". If we get originals from different foreigners, we'll try to crack it and send this one as fast as possible back with the note for example; "Thx to...(name)...for the original...". It's an advantage also for you coz you get the hottest cracks directly from unicorn.

13°) And the originals ? They're missing?

The fourth point...yes : originals! Winch one harder protected are extremely hard to crack if we haven't a working original. It was more than lucky, that the "windsurf willy" crack was so easy (10 mn and the protection was found). This hack' don't needed the datas for a longtrack. Programs like "Populous": we and also other guys wouldn't be able to crack, if the original isn't present. It's also easier to crack, if we can play it once to see the functions the program must use. "Free constributor" must send the working original with the manuals (a little note: we do also trainer versions with the documentation).

14") If they're existing some teams would to co-operate with Unicorn? yes or no?

We think our name is famous enough to stand alone. We've become offers of many crews: IT, the band, Rawhead, black monks, vision factory, alpha flight, fraxion and many more to go in co-operation with unicorn. That cool guyz but we decline all this offers. We not want a co-opeation in next time. Equal what of crew. Sorry, maybe other time. Your questions to joined APOLOGY? (... i remember...). Sorry, but i say no! (ah!ah!ah!). Members of unicorn are very well and lives in Erlangen (our city). We see us (if you want) every day. If necessary, i come of your offer back. But i think not in the next time. I was questionned the unicorn members if he wants a co-op with APOLOGY and we talk half hour of your offer. We think, we don't want a co-op with APOLOGY (...remember?).

15°) Are you afraid by the local police ?

I'm very already to close my latest postal box (plk), coz' police...i'm not afraid of this...but it's not so dangerous for my friends and contacts who're live outside of Germany...lucky guys! Fuckin' policemans and postmans...aaargh!!

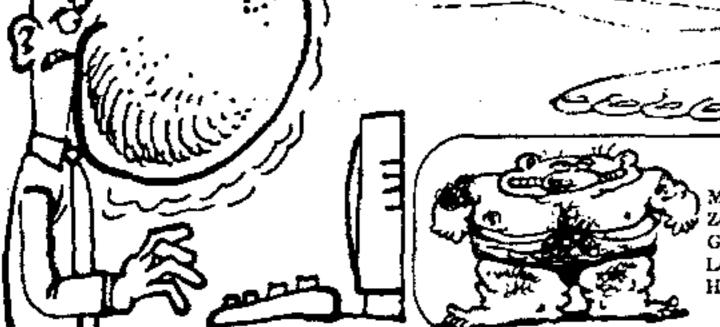

16") Okay...our last question...what's your plans for the future ?

Continue to produce our legendary compactings (games and demos), Soundtracker collections, new cracks & cheat modes, trainer versions, a new intro (much better than our latest), maybe a music-disk and some other surprises!!!

/ UNICORN MISTER MIG

HOW TO TRANSFERT A TUNE?

This is the little coding section this month. "How to vanishert a tune" may be useful for yet intro, demo, etc... First of ail, find the Memory loc. of the tune. For example, if ye want to transfer a tune in \$C000 to \$C1000. Transfer first the whole tune in 1000 using a monitor. Then change in the tune, prog all LDASCXXX, STASCXXX (etc...) in LDAS, STAS1XXX Once done make the first try. Save the new \$1000 tune, and start the player (must code it yourself). Sometimes, it will work But in most of cases, the tune is destroyed. Load it again and look in memory for datas looking like this : XX CX XX CX XX CXetc...if ye thing there are enult suck dates, then turn them. into XX 1X, save the new tune, and start the player again. It will work (usually). Therefore, if it doesn't load your tune & make sure you've not for gotten any "CXXX" in the tune code, then search for LDA - \$CX or CMP \$CX, etc...(in Seedesoff's tunes), and change them. If it still doesn't work, then look at the starterwith a closer eye and check out all of the datas transfered. If you see any "XX CX" datas, then change them, and restart again. If, finally, the tune doesn't work, then ckeck yourself where the trouble is, coz i can't help you enymore !

AND RUMOURS! It seems that the famous "MISTER CURSOR", has done the first official. Raster-bar, in the early days of the C-64. Remember "Platou": ? Game was designed and cracked by the same team : WOT strange or what ? Remember this good (old) days when Triad and Fi_T were at the top of cracking scane in 86-87-88, Mister Z + Janitor were the main crackers of TRIAD, and Gollum & Strider : equally in FLT. Well, it seem that both groups were totally restorted. LAME! LAME! LAME! Can you believe that the : " New Triad " stopped cracking and won a demo-competition in '89 ? And the same about FLT except that they keep on releazing some cracks? this teams have totally changed, but are still ruling. Remember "Hawk eye" ? this Great & legendary game was coded by the :Boys without brains who used to take part in the 87 Illegal scène. This shows that more and more software is developped by ex-hackers. Remember Pulsar ? this exreasons: I think the 1st that mik, main cracker, left for dos. and the 2nd is that they've trench slave named "Numitor". Dos : "the long living group" died, it was already the top in 1985,1986, 1987, etc. . It seems that an unofficial musiccomposing-time competition place between Maniacs of noise and 20th Century composers (20cc), Time / Mon was composed Smooth criminal in 2 minuts, Edwin V.S./2000 has finished "SPUKERHOEK 2" in 4 minuts. Yaou!

Rest is just a bunch of loosers that never can crack a game fast enough. We was i in the world with 2 Games: xenophone, clowers-o-mania. Fairtights cracker was in Horizon but he went to FLT coz he got a free modern 14.400 HST from ZIKE / FAIRLIGHT (shith), in to the next summer juri will come to Gothenburg (Sweden) there i live and we'll probably go by car to ITALY and FRANCE (to visit youl) who knows 77), we're really furmly guys! CHRISTMAS PARTY (26 - 30 December)

Report of the Dominators - Trilogy - Upfront party in Randers (Denmark). The trip from Angers (France) to the party place (Randers in Denmark) was 18 hours long. When i arrived, most of the freaks were still computing, and i had to pay 80 Dk (about 80 Frs or 20 marks). To enter the place was a big school where all the guys were scattered in five rooms. I room was reserved for the video-copies (Freddy 5, Back to the future 2, L'ours, Vendredi 13 chapter 8, Chérie j'ai retrécie les gosses, etc...) with a giant screen to see the latest. 2 rooms were exclusives for the sixty-four, I for the Amiga and the last one was half sixty-four and half Amiga. Some camps were made between the rooms where there mainly: Fairlight, Horizon, Light, Censor in first; Bones, Nato, Beyond force, Vibrants, Upfront in second; and finally Illusion, Genesis, DCS, Dominators, Contex, Success, and Nuclear. Contex (Drake) bring Ninja Warrior and Genesis the latest magic disk 64, so that was most of the new games. There, we could have seen and get the latest demo of Contex with another digit from Cycleburner and graphics from Scrap. Horizon have coded some new fantastic parts i can describe you. On amiga was shown SPACE ACE, the final version, and Ninja Warrior. Finally, at the demo-competition, it seems that...... REBELS have won on Amiga and Triangle on sixty-four but i'm not sure of these results as noone have been declared winner (lack of organisation!). In conclusion, that was the best (probably) party of the year (all the leadings were present) but we all hope more organisation for next year!! (Signing off: TAGADA / BABYGANG),

COSMOS STORY (THE STORY OF MY COMPUTER-LIFE) BY BIG BEN

I began in winter 1987, my friend and me founded a "computer-group" called "Big + Ben". After some months laining around, we joined a local

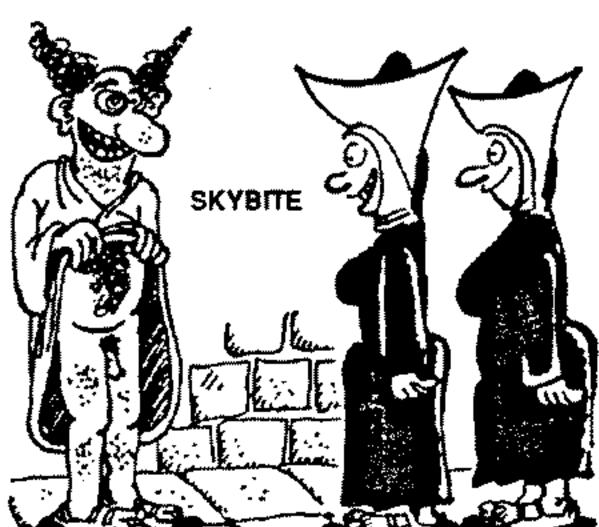

lamer-crew called "Disaster". 3 days later, we got a call from Tsk-Crew : The Softkiller, and he asked us to join. So, in march 88 i joined my first real cracking-gang. Members of the TSK were: Antitrack, Big + Ben, Copyright hunter, SSD, The Softkiller and

a demo team called Icon. In summer of 88, we got some troubles with Softkiller and left TSK. We were: Antitrack, Big Ben, S Zodiac (former a member of Big + Ben) and Icon. We had a group but no name for it, then i had an great idea : "COSMOS Everybody liked the name so COSMOS was founded. We got 3 new members (Floyd, Trash (amiga) and Hermes). We made so Amiga-cracks too, but the C-64 was our favorite machine. Everything was OK, til september of 89 when SSD quit the complife. We had no supplier and the crew broke down. What happened to the members 7

- SSD : quit Zodiac : quit Floyd : quit : joined an Amiga crew Tranh : now Cosmos Designs - Icon Hennes : not clear : joined 711 Antitrack

NEWS AND RUMOURS

How's the police business in France? in Norway we have a copy law. But the Police don't bother doing anything about the illegal copying and cracking. But one reason is probably that were are very few groups in Norway who cracks, since we have difficulity to get the originals fast enough. But that will probably change in the future. Exclusive swapping with AVALANCHE.

woa, it's hyde of complex. Hey kid icarus! i want to get your papermagazine coz it is just a super, greatest ever made. Why did you said that EXEC is legend? I think they were just a shity lamers, and cooperation between GATE & EXEC was stupid mistake. Now, cooperation is over, EXEC is dead and GATE has lost some members, like MPH, HYDE (me!), BITRANGER.

DRAGONS are now divised in two different way, some members are in Bamiga Sector One, and Megablast & other members were formed SUBWAY (french section): but there're just rumours!! SCOOPEX FRANCE (our french section? just one or two members!) is true! really! arf! liar??!

ALCATRAZ MEGADEMO 4? coming soon...probably one of the best ever made, why? musics by moby & greg, graphics from PGCS, coding by Metalwar, Skyman, Eric, Zodiac (??), etc...Great

Double density crew will make soon... our Megademo (spreading date : for the DDC-AVENGER-VISION party) in Holland for the medium of january! Watch out! Codes are done by BYTE RIDER, with some musics from Moonraker. logos from me (Snowman), additionnal coding by ROCKY / DDC. Taskmaster is now in AVENGER...after the Starhawks chapter...STAR is now ALCATRAZ (greg, nifty nit, metalwar, pgcs, etc...) STAR ? Scattergold of Brainstorm, nifty nit, metalwar, pgcs, greg, etc...! Assured Destruction MUTUAL

AXIOM of MAD was INTERVIEWED by DEMONIAX on 15 FEBRUARY 1990. Let's start the interview, pals !!!! 1. Hi, AXIOM, let's start the interview?

Let's go man!

2. When was born Mutual Assured Destruction and how?

Well, we are born in the late november 1989 with some ex-members of well known groups. We wanted to be cool and to be in the leading cracking and demo groups.

3. Why ?

Just because the scene was getting lame with the supremacy of Paranoimia and Quartex.

4. What is your functions in MAD ? how old are you ?

I'm swapper and organizer, very soon Modern trader. I'm 17 years old!

5. How many contacts do you have ? Mail or Modem ???? We have about 150-200 contacts by mail. For the modern trading, we have about 10 modern traders in Europe and Usa. Call one of our 3 BBS : Devils Island (516 - 744 - 2101), Instruments of Darkness (51 - 325 - 6327), Amiga East (804 - 486 - 2697); 6. What do you think about the scene and what are you favorite groups?

According to me, the best groups are the teams who're able to crack hot stuff & to code cool intros and demos as well! It is why i like Vision factory, Subway, fairlight, Tarkus team, Scoopex or Trilogy! For Quartex, they don't do anything at the moment and Paranoimia is not a group because they buy the other groups to code, crack or phreak! Those poor lamers are not able to learn anything.

7. What are your Projects ?

We'll try to keep on our numerous cracks, but our coders, graphists and musicians are working on our first megademo! We also try to visit every copy-party we can. We try to be everywhere.

8. For you, what is the leading country ?

I think that there are no leading countries, b-coz' every leading groups have members in 3 or 4 different countries, there are no leading groups which are 100% Danish, Swedish, Germans or french.

9. Okay, thank for answering so friendly those questions and good luck for the future I thank and hope to hear from you very soon!!!

AXIOM of MAD I DEMONIAX

INTERVIEW FROM I Q64 / MOZ (IC) ART / SHAPE

1. Hi Trond, how old are you? I'm 68/3 times older than moz (ic) art. (now, i'm 17 years old).

2. When did you get your C-64? I got myself my 64 in autumn 85 (After much arguing bout who paying it').

3. Which were your differents groups before SHAPE?

Right after getting the machine I started a group called "Bokn cracking service". It was lame that i'm not going to pay it any more attention! After i had some tunes on the sound-monitor I joined the norwegian-canadian group : "The Whiz Kids" (so did Predator) but it was difficult to keep up the contact with the canadian part (hair a year between each sending) so I and Predator (Geir Tjelta) joined "The Suppliers" (a norwegian group) after making a rather nice demo. Rawhead (Shadows) was also interested. But since we were the only dudes making anything in this group we quited. During the summer of 89, we created moz (ic) art (which means : mozart, music, ic (chip), and art). Soon Unitrax asked us if we wanted to join SHAPE, and so we did. (Unitrax was always been a good friend of us).

4. How long (Hours / Days / Months) do you stand in front of your 64 ?

I'm not spending too much time behind the computer while schooling. Only 1-2 hours a day. The most of our zike we make together during the holidays.

S. What sort of music do you listen to?

Hike Pet shop boys (+ electronic), Future generation, art of noise, koto, jean-michel jarre, Paul Hardcastle, Jan Harremer and some other dudes. (I hate guitar music, too typical sound you see).

6. Who's your favorite musician on 64 ?

Tim Follin!!! No doubt, he's just great. His 'Bionic Commandos musics' are the best tunes ever made on the C-64 (It really deserted the 'commodore Oskar') He's able to make everything from Heavy to Jazz and contemporary... music! I know his last basketball music wasn't that good, but everybody makes mistakes! I would like to use the opportunity to tell you that I think David Whittaker is the worst music composer ever. The "ATG" music is the worst he has made. It's completely rubbish! His nickname should be "THE ARPEGGIO DEVIL".

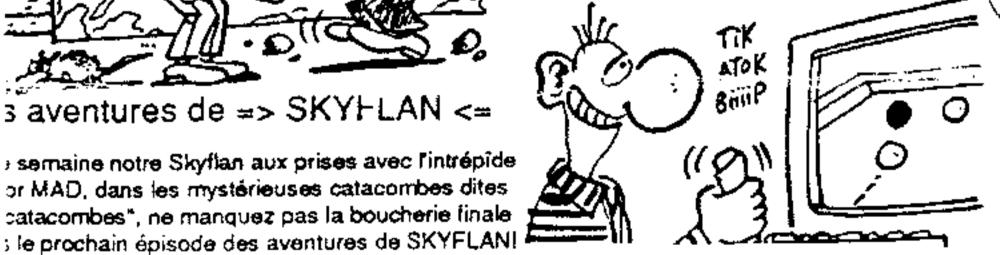

7. You're not as samous as maniacs of noise of course, but your different musics are more'n'more in several intros and demos...would you like to sell your lunes for a Software House?

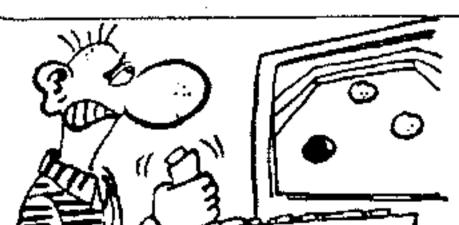

It's true that we're not as famous as maniacs of noise, but then we haven't made any game-times as they have. We have also been observing that people are using our music more and more. Especially the tune called "Luminous"

8. At last could you talk about your future projects for you and SHAPE?

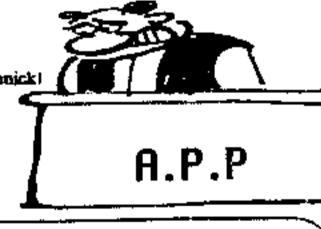

There have been lots of people asking me that question, there will soon be released a little tricky demo (Pebruary, or March, or something like that) this will (of course) contain some new music from us. In June 90, there will be releazed a big demo build up around an actual subject. It will contain some very special routines. I know there'll be a part moving around over 1000 dots (plots) at the same time. Shape will contact some of the best coders and designers around. Together with the rest of shape perfection can be a reality, remember Shape - always surpassing Thank to Tagada of Babygang for these cool quesions, and good luck for the future...for your magazine "BYG"!!
